

Our Best to You!

We hope this letter finds you looking forward to spending quality time this season with those who are truly special to you. All of us here at K&W extend our best wishes to you, and your family as well.

Over this last year we helped clients with home electronics solutions that covered stereo systems, TV & movies distributed thru the home, home theater, Blu-ray play-

ers, computer based storage & access products (a growing area), cameras, lighting and blind control, custom made brackets, slides, lifts and a host of other real cool stuff. It's been very interesting and fun!

Our award winning installation, fabrication and programming department deserves credit for the great work they do to make every installation stellar too.

We always have the latest products like the finest new speakers, Blu-ray players and the like, but around this time of year we make sure we have the clock radios, quality personal headphones, turntables and accessories you need to make your little Sue or Sam Who, a happy camper on Christmas day, no matter your budget.

If you're looking for gift ideas for loved ones, or as a group gift to the home, we're happy to

offer a little help, and hopefully reveal a product or concept that will make that certain someone's Christmas very special.

We invite you to drop in and take a tour; there is always something cool here that's just perfect for giving or receiving!

Speakers on SALE!

With the recent fluctuation in our currency versus the Greenback, pricing on many U.S. products has increased. We are working to ensure these changes are held off for you over Christmas and Boxing Week.

Here's a great example – while **Speakercraft**, the finest architectural speaker maker in the world has had to raise their prices – we bought big the day

before they came into effect, to make sure our inventory was still at the lower

pricing for you. Add in our Sale pricing and you have as much as 30% off on (the best) selected models!

Our investment advice to you is that now is the time to purchase things for you and your loved ones that gives the joy of music, plus enhance one's home value, all at the lowest possible cost.

Blu-ray Disc is the Cool Thing!

Do you want to get a present for that special someone who thinks their Home Theater is complete?

Perhaps they have it all already... Projector, screen, Flat Panel, Surround processor, 9 speakers and the cool remote.

How about a Blu-ray player? They won the format war you know, and will also play DVD's, CD's and all

formats of burned discs from your computer. With a new **Panasonic Blu-ray player** you will see the resolution that your High Definition ready flat screen TV or projection system is capable of plus the sound is better than ever too!

someone off the list, and enjoy watching movies with them over the holidays enjoying a more breathtaking experience than ever before!

Best of all, we have great deals on quality players starting well under \$500.00. So with a single purchase you can strike that special

URC universal remote ! It's simply a civilized way to go.

Flat Panel TV Soundbars & Mounts

If you still watch a 2 foot deep TV, another home addition that is just the ticket, is a flat screen. **Sharp LCD TV's** and **Panasonic Viera Plasmas** come in a variety of shapes and sizes. We also stock a selection of innovative wall and cabinet mounts, plus speaker sound bars from **Yamaha** and **Definitive Technology** which will make your display's location just a bit more hi tech, integrated and way better sounding too. A flat TV looks better hanging on the wall, and you can have real surround from a single speaker under the TV!

That flat TV and Soundbar can hang on the wall or slide up out of a cabinet; it's up to your imagination. If you are a bit stuck on ideas, take a look at our web site for our installations. We showcase innovative projects that we have completed for people just like you.

If you need us to make your ideas happen, we are only a phone call away!

Special buy on the Award Winning JVC HD-ILA Projector

Home theater is projection based. Media rooms are great, but for a true home theater experience, you need a projector.

When one installs a projector the distance from the projector to the screen is critical, as the screen size is dictated by this distance.

State of the art projectors are more affordable than ever, offering higher performance than previously possible too. Look at the stunning **JVC HD-ILA projector**. 3 chips, full HD resolution, no visible pixel structure and blacks so deep you can swim in them...it doesn't hurt that we have them on sale either.

The new JVC HD-ILA offers wide adjustment, so it can replace old CRT projectors (which sit very close to the screen) or old long throw digital projectors. Flexible install and pricing starting below \$6000.00 (yes that's right!) for up to 150 inches of vibrant HD picture all contribute to why its the Projector of the Year.

Crestron's New Remote

Perhaps it's time to tackle those remotes all over the coffee table, along with integrated control of your thermostat, security system, blinds and furnace, and add simple control to all of your home systems. It's the green thing to do.

You know you won't use the system if using it is difficult, but managing modern surround processing media along with all of your homes sub systems can be downright convoluted without a control system. It's time to automate.

Crestron has introduced their coolest control surface to date, the TPMC6X, and if this top end automation system can handle the needs of NASA, and the Military, you know home electronics will be a breeze.

New environmentally designed structures need a control system, or they simple aren't as efficient or friendly as they could be. Custom designed to your application we can make using your Home Theater or your entire home as easy to operate as a bank machine.

Grado Headphone SALE!

Grado make the finest headphones in the world. Not the most expensive, just the best!

Starting under \$100.00, they offer a big step up in sound quality from the factory ear buds that came with your iPod. They allow you to listen to the TV and rich music without bothering anyone around you too.

A great gift idea!

Boston Clock Radio

Boston Acoustics has a couple of new quality shelf top clock radios, with remote control and iPod connectivity too!

Blu-ray has better sound—your Surround Amplifier needs to keep up!

Is it finally time to replace that older surround processing receiver with a new state of the art unit? You will notice the difference!

Yamaha makes a fantastic, new receiver called the RXZ7. It offers HDMI Switching and state of the art video up-conversion (allowing you to use fewer cables in hook up while increasing the video quality of the lower resolution sources). All formats of Blu-ray HD audio decoding are included.

It's also a network receiver, so it will connect to your LAN, and automatically find all the music on your computer,

then stream it for playback thru the system. Isn't that cool?

Offering 7 channels of clean power (140watts per channel), USB Jump Drive input, XM and Sirius radio, plus a set up microphone combined with sophisticated AUTOMATIC calibration—it has it all.

We have it on sale for Christmas. If you act now, add the Yamaha matching Blu-ray player for only \$399.99 more, a **\$600 dollar saving!**

 control switches.

Stewart Filmscreen - CineCurve Screen

CineCurve is **Stewart Filmscreen's** solution for projectors equipped with anamorphic lenses. The 2.35:1 screen maintains a constant vertical height and eliminates horizontal black bars at the top and bottom of the screen. The projector and anamorphic lens combo fills the entire height of the CineCurve, resulting in an image that's bigger and brighter than that found on a traditional screen. The curved screen immerses the viewer in the video experience and is a perfect complement for that new projector!

Merry Christmas and a Happy New Year!

More than just hinting at what's to come for the home audio industry, **SpeakerCraft** has added a mobile browser interface, compatible with the **Apple iPhone** and **iPod Touch**, to the web server embedded in their **MODE** distributed-audio system. Now your phone is a remote too!

We have a lot more ideas if you haven't seen one here that lights your Yule log, give us a call, or drop by - we are happy to provide a few more suggestions. Don't forget, we offer our clients Boxing Day pricing before Boxing Day too. Just ask!

We wish you, your family and friends a very **Merry Christmas and a prosperous and Happy New Year.** Hope to see you soon!
