

Volume 16 Issue 1

Winter 2012

Merry Christmas!

Our sincere best wishes to you and your family this year are the ability to slow down your life, just a bit, and have the time to look around and appreciate and enjoy everything that makes your life so very special.

This year we have a great selection of cutting edge Digital Music Streamers, iDocks, Compact Audio Solutions, Speakers, Amps Headphones and even Turntables - all perfect gifts to help you shorten up that list and hopefully help you reduce the stress just a bit.

We are thankful to meet you, and as well, for being able to play with really cool new gear most every day!

By providing you with escape and artistic enjoyment in the music & movies our systems recreate, we hope you feel enrichment in your quality family time and in the process, your life.

Remember too, we honor Boxing Day pricing through out December when you mention you read it in this letter. It's our way of helping out, so come down for a visit, and get what you need, without the crowds.

One of the many wonderful things we give thanks for around this time of year, is that we get to contribute to bringing families like yours together at home. Thank you for that!

Here at the shop, this time of year sees us stocking up on all sorts of cool new items, perfect for gift giving, including those for the new digital age streaming music lover.

From the entire K&W family, we wish you a fun, rich and meaningful Christmas and a New Year full of happiness & promise!

As a result we get to meet new friends, like you, with interesting & unique projects.

If you need a little gift guidance for someone like that, well that's the idea here! Just take a snoop thru this letter or even better, drop by for a little tour.

Buy a Definitive SuperTower System and get **FREE** Surrounds

Professional audio reviewers and audiophiles alike have consistently praised the Definitive Technology Super Towers for their winning combination of performance, styling and value.

This is the perfect opportunity to own the music and theater speaker system of your dreams, because until the end of January when you purchase a pair of the BP8060 Super Tower speakers for \$2299.99 you get a

matched Definitive center channel speaker **and** a pair of complementary matching surround speakers **FREE**. That's right, **FREE!**

That's a saving of well over a thousand bucks!

The BP8060 Super Tower system will give you goose bumps every time you turn them on, last a lifetime *and* plaster a giant ear to ear grin on your face every time you crank them up!

*Buy any Definitive SuperTower System
Get a FREE pair of Surround Speakers
(Save \$1149.00!)*

System Today!**

FREE Subwoofer with Martin Logan "Soundbar" Purchase

It's those darned laws of physics that dictate that if you want big sound you need to move lots of air, and you just can't do that with small, thin speakers. ...And where do we get small thin speakers?... Why, in that cool new flat TV!

Martin Logan's team crafted the Motion Vision SoundBar to look as spectacular as it sounds - creating a luscious, high-gloss, piano black sculpture with touches of brushed aluminum for a visually unobtrusive design.

Martin Logan has thrown down the gauntlet at wimpy, thin-sounding TV speakers by crafting the ultimate single speaker surround system, & by delivering five separate home theater speakers with a one piece solution that reproduces recordings with unflinching accuracy & detail.

For bass aficionados the unit allows the addition of a compatible wireless Martin Logan subwoofer, and for Christmas, when you buy a Motion Speaker for \$1,999.99, we are including one at no additional cost, saving you over 800 bucks... the very best sound for the very best price.

SONOS gives you *ALL* the music on earth. Wirelessly.

Wouldn't it be great to have ALL of the music you have on EVERY computer and digital device in the house at your fingertips...in any room...without having to be all techy or run wires?

You can. The utter simplicity, quality and convenience Sonos brings to music access around the house is unrivaled. Big words—and thankfully... completely true.

There is no better time for the family to discover the modern world of whole house music, delivered wirelessly, than now.

This Christmas, when you purchase an S5 and S3 room sound system, you'll receive the one other item needed to make them all sing along (Called a Bridge) for... **FREE!**

Operate your system easily from your smartphone or iPad, within minutes of unboxing the items... NO Allen wrench's or Swedish instructions needed!

Our friends at Yamaha have released a new statement Home Theater receiver, called the RX-A3020. Change out your aging Dolby Digital processor, the one you need is here now.

This 9.2 (expandable to 11.2) Network A/V Receiver will bring your family many years of musical and movie enjoyment, and it's just packed with new useful features.

From simple access to all of your music on computers everywhere in the house, to comprehensive iPad and iPhone control and remote playback.

4K Upscaling, Network Radio Rhapsody, Pandora, SiriusXM, Airplay and 3D compatibility mean that there is nothing this 150 Watt PC power-house can't do, & we have it **ON SALE** this Christmas for only \$1,999.99.

Sometimes you want it to be just you and your music, in your own personal space. The new PSB Active Noise Cancelling Headphones get that, and they don't let anything come between you and your music.

Thanks to PSB's exclusive Room Feel™ technology, your music will sound so rich and natural you'll think you're listening to a set of high-end loudspeakers. A **Great Gift** idea for anyone!

There is no mystery to good sound!

Wireless Music Made VERY Simple

Hi-Fi Choice, the leading British audio publication and guide for today's audio enthusiasts, states;

"simply plug in NAD's DAC 1 Wireless USB DAC transmitter into the computer, and the receiver into the hi-fi system for a "simple solution as one could imagine" to stream digital music in uncompromised quality!

With wireless hi-fi taking off, this is a great new product for anyone wanting to play music from the computer on ANY stereo.

It's on **SALE** for only \$299.99!

"No access codes to enter, no 'visibility' to set, nothing. If all wireless connections were this simple the world would be a better place."

"...connect the transmitter to a USB socket on your home computer (any of the usual flavours) and connect up to the DAC itself to your hi-fi via either analogue or digital (electrical) connection, and off you go."

"We've installed various bits of USB hi-fi over the years, but this was the quickest and easiest of the lot, running within seconds of connection on both PC and Mac..."

"It actually compares very well, with CD players of the £500 variety, producing sound that's clear, detailed, lively and with particularly excellent bass weight and extension. In short, it delivers what it promises."

Little Console, Really BIG Sound.

The all new Marantz Consolette features classic Marantz elements such as a circular display window and a classic gyro wheel control on her front panel, and the technology powering her is all state-of-the-art.

sliding tray, as well as USB and standard line audio inputs.

Consolette's most impressive aspect is the sheer magnitude of her sound though.

She uses specially developed BMR (balanced mode radiators) drivers that, in conjunction with the 5.25" subwoofers and bass ports, give the Consolette a full, rich sound that is incredibly consistent everywhere in the room. She's on **SALE** for only \$1,199.99 too!
